Study #3238

**Contributing Projects:**
- P251 - Reducing agro-food induced GHG emissions through effective FLW reducing strategies

**Part I: Public communications**

**Type:** OICR: Outcome Impact Case Report  
**Status:** On-going  
**Year:** 2019

**Title:** Dutch ministry of Agriculture, Nature and Food Quality is stimulating circularity (including reducing FLW, reducing GHG emissions) through new platform

**Commissioning Study:** <Not Defined>

**Part II: CGIAR system level reporting**

**Links to the Strategic Results Framework:**

**Sub-IDOs:**
- Reduce pre- and post-harvest losses, including those caused by climate change

**Is this OICR linked to some SRF 2022/2030 target?:** Too early to say

**Description of activity / study:** <Not Defined>

**Geographic scope:**
- National

**Country(ies):**
- Netherlands

**Comments:** In line with this initiative in The Netherlands, we are working on a 'Green deal' in EU of a "Farm to Fork Strategy" initiative, addressing FLW and GHG emissions.
