

Green growth strategy

Project Title: P771 - Shaping equitable climate change policies for resilient food systems across Central America and the Caribbean

Description of the innovation: Climate mainstreaming in policies is a key issue to create an overarching enabling policy environment. The green growth policy can be considered as an institutional innovation as integrate the concerns of agriculture change in the context of CC in a holistic national strategy of development, beyond climate change specific agricultural policies. It thus contributes to facilitate the mainstreaming of CC issue in other sectors and links with economic objectives of the country.

New Innovation: No

Stage of innovation: Stage 1: discovery/proof of concept (PC - end of research phase)

Innovation type: Social Science

Geographic Scope: National

Number of individual improved lines/varieties: <Not Applicable>

Country(ies):

- Colombia

Description of Stage reached: Adoption of the Green Growth policy of Colombia

Name of lead organization/entity to take innovation to this stage: DNP - Departamento Nacional de Planeación (Colombia)

Names of top five contributing organizations/entities to this stage:

- Crece - Centro de estudios regionales cafeteros y empresariales

Milestones: No milestones associated
